The Utah Survey Resources portion of gis.utah.gov is designed as a statewide resource for sharing information pertaining to surveying, cadastral, and related activity.

In addition to links to local surveying activity, this portion of the site contains information on TURN, the state GPS reference network, cadastral GIS data collection, and items related to the Public Land Survey System (PLSS).

- [TURN GPS Network](#)
- [Survey Office Web Map](#)
- [State Code](#)
- [Pending Legislation](#)
- [County Surveyor Links](#)
- [PLSS Standards](#)
