

K-12 Educator GIS Mentoring Program

Contributed by Kevin Sato
09, May. 2008

Over the past several years, the Utah State Office of Education, ESRI, AGRC, UGIC, and the Utah GIS Alliance have worked to introduce GIS technology into Utah K-12 classrooms. Spatial reasoning, map-making, geographic awareness, technical skills building can't start early enough, right?

The Utah K-12 GIS Educator Mentoring Program is designed to help K-12 educators link up with GIS professionals in a mentoring relationship.

For more information on becoming a mentor or the search page for educators interested in utilizing a mentor:
