### Utah Entry-Level GIS Jobs Survey

The Utah GIS higher education community (including public and private universities, and community colleges) is seeking input from employers across the state on how we can best prepare our students for their careers. If you are involved in the hiring of entry-level GIS employees (past, present, or future), please take 10 minutes to complete this anonymous survey; if not, please pass it along to those who do hire. Your input here will help to shape GIS education in Utah for years to come!

<http://webmap.geog.byu.edu/survey/index.php?sid=67358>

Survey responses will be accepted until May 31, 2008.

Results will be posted on the Utah GIS Portal.
