

## VBA: Turn Off Extensions

Contributed by Bert Granberg  
02, Jun. 2008

This script was written to turn off all ArcMap extensions previously in use when a new map document is opened. Install it in your Normal.mxt This Document code window and save. Should work in 9.1 and 9.2.

Private Function MxDocument\_OpenDocument() As Boolean

```
Dim i
Dim pUID As UID
Dim pJITExtMgr As IJITExtensionManager
Dim pExtMgr As IExtensionManager
Dim pExtConf As IExtensionConfig
Dim pExt As IExtension
Set pJITExtMgr = Application
Set pExtMgr = Application

For i = 0 To pJITExtMgr.JITExtensionCount - 1

    Set pUID = pJITExtMgr.JITExtensionCLSID(i)
    Set pExt = pExtMgr.FindExtension(pUID)

    If Not pExt Is Nothing Then

        'Debug.Print pExt.Name

        If TypeOf pExt Is IExtensionConfig Then

            Set pExtConf = pExt

            If pExtConf.State = esriESEnabled Then

                pExtConf.State = esriESDisabled

            End If

        End If

    End If
End If
Next

For i = 0 To pExtMgr.ExtensionCount - 1

    Set pExt = pExtMgr.Extension(i)

    'Debug.Print pExt.Name

    If Not pExt Is Nothing Then

        If TypeOf pExt Is IExtensionConfig Then

            Set pExtConf = pExt

            If pExtConf.State = esriESEnabled Then

                pExtConf.State = esriESDisabled

            End If

        End If

    End If

End If

Next
```

End Functio
