Last Updated 18, Aug. 2008

The following update has been made to GIS data residing on the State Geographic Information Database's ArcSDE server, [gdb92.agrc.utah.gov](http://gdb92.agrc.utah.gov) (v9.2):

The SGID U024.Transportation.StatewideStreets feature class has been updated on the SGID ArcSDE Database Server. Shapefiles and File-Based Geodatabase files for StatewideStreets are also available for download on the SGID FTP site. Geocoding services, ArcIMS Applications, and ArcGIS Server Applications & Web Services are now using this new data.

Important note: This new data implements the new 84081 and 84721 zip codes made in West Jordan and Cedar City [more information] so if you're using this data for geocoding, you'll want to make sure that your address data carries the new zip codes in these areas.

The update includes (by geographic extent):

- Statewide: CFCC vs. ALT\_NAME vs. S\_TYPE attribute improvements; LABEL field is no longer populated with SUF\_DIR for alpha streets
- Box Elder: Major Highway attribute improvements
- Davis: 'Schick Lane' issue resolved - now called 'Bonneville Lane'; geocoding/attribute improvements; Layton -updated entire dataset; edge-matching improvements (Blue Stakes of Utah edt suggestions)
- Duchesne: geocoding improvements between Fruitland and Starvation Reservoir
- Juab: edge-matching improvements
- Iron: attributed streets within the new Cedar City zip code 84721
- Millard: edge-matching improvements
- Morgan: geocoding/attribute improvements (Blue Stakes of Utah edt suggestions)
- Piute: updated entire dataset; edge-matching improvements
- Salt Lake County: Major Highway attribute improvements; added additional roads from features from the 'SaltLakeCoSurveyorStreets' layer that were not previously in dataset; zip code improvements; attributed streets within the new West Jordan zip code 84081
- Sanpete: duplicated roads removed
- Summit: geocoding/attribute improvements (Blue Stakes of Utah edt suggestions)
- Tooele: added additional roads that were not previously in dataset. And also: geocoding improvements in Stansbury Park; I-80 on/off ramp improvements (Blue Stakes of Utah edt suggestions)
- Uintah: geocoding improvements; updated numeric road names
- Weber: additional suffix directions populated (Blue Stakes of Utah edt suggestions)
