Last Updated 28, Sep. 2007

AGRC is upgrading the State Geographic Information Database (SGID) database server to the new ArcSDE 9.2 software release. To view/use data on this server (gdb92.agrc.utah.gov) users will be required to be running an ArcGIS 9.2 client beginning December 18th, 2006 (note: this was originally the 12th of Dec.). More information will be posted on this site>. If you have specific needs, questions, please contact michaelfoulger@utah.gov or mpeters@utah.gov at AGRC.
