

SGID: Municipal Boundaries Update

Contributed by Bert Granberg
04, Dec. 2008

The SGID.U024.MunicipalBoundaries feature class has been updated in Wasatch County, including the addition of two newly incorporated towns: Hideout and Independence.

In addition, municipality names have been changed, where necessary, to reflect the city/town name as it appears on UDOT's official state highway map as it was felt that the highway map best represents a balance of both preferred and colloquial name designations for cities and towns across the state. As an example, 'Ogden City' is now 'Ogden'. In the future, we'll include GNIS names and official incorporation names as well.

Updates are available via connection to the SGID ArcSDE Server and in file-based download products in SHP and FileGDB formats.
