Last Updated 08, Oct. 2009

The following update has been made to GIS data residing on the State Geographic Information Database's ArcSDE server, gdb93.agrc.utah.gov (v9.3):

The SGID SGID93.TRANSPORTATION.Roads (known as U024.Transportation.StatewideStreets in the SGID 9.2 Database) feature class has been updated on the SGID ArcSDE Database Server. Shapefiles and File-Based Geodatabase files for Roads are available for download on the SGID FTP site. Geocoding services, ArcIMS Applications, and ArcGIS Server Applications & Web Services are now using this new data.

### County Updates:

- Daggett: Received centerline update 9/17/09: new roads added; geocoding improvements
- Millard: Received centerline update of addressed roads 8/27/09: new roads added; geocoding improvements
- Salt Lake: Received centerline update of Emigration Canyon 9/8/08: updated entire dataset; geocoding improvements
- Utah: Received centerline update 8/19/09: new roads added; geocoding improvements

### UDOT Route System:

- Statewide: Improvements were made to the geometry and attributes that describe the UDOT state and federal routes (DOT\_RTNAME, DOT\_F\_MP, DOT\_T\_M). Also, the DOT\_RTID field that stores the unique route identifiers was updated.

### Blue Stakes of Utah Feedback:

- Garfield: geocoding improvements
